

## Learning Community Practice Presentation Highlighting Innovative Anti-Poverty Practices

In recognition of their completion of this cycle of the Learning Community, the LCRC was pleased to facilitate our Practice Transformation mini-general session at this year's Annual Convention. Over the course of the last 16 months, more than 120 Community Action Agencies from across the country have been actively engaged in one of five closed Learning Community groups.

This session showcased six participating agencies as they recalled how their work was impacted by the Learning Community process. The agencies shown below had the opportunity to share their successes, challenges, and lessons learned from their respective projects.
